Science That Cares for Every Crop, Every Farmer.

FORMULATIONS

Code	Name
Solid Formulations	
DP	Dusting Powder
DS	Powders for dry seed treatment
DT	Tablets for direct application
EG	Emulsifiable Granules
EP	Emulsifiable Powders
GR	Granules
GW	Water soluble gel
SG	Water soluble granules
SP	Water soluble powders
SS	Water soluble powders for seed treatment
ST	Water soluble tablets
WG	Water dispersable granules
WP	Wettable Powders
WS	Water dispersable powders for slurry seed treatment
WT	water dispersable tablets
Liquid formulations - dual character formulations	
SE	Aqueous suspo-emulsions

Code	Name
Liquid formulation- Simple solution	
LS	Solution for seed treatment
OL	Oil-miscible liquid
SL	Soluble liquid
ULV	Ultra-low-volume (ULV) liquids
Liquid formulation-solution for dispersion	
DC	Dispersion concentrate
EC	Emulsifiable concentrate
Liquid formulation-emulsion	
ES	Emulsions for seed treatment
EW	Emulsions, oil-in-water
ME	Micro-emulsions
Liquid formulations - suspensions	
CS	Aqueous capsule suspensions
FS	Flowable concentrates for seed treatment
OD	Oil-based suspension concentrates
SC	Aqueous suspension concentrates

Toxicity Trainagle	Toxicity Level	Label
	Extremely toxic	Red coloured lower triangle, white upper triangle along with skull and cross bones and written as POISON
	Highly toxic	Yellow coloured lower triangle, white upper triangle written as POISON
	Moderately toxic	Blue coloured lower triangle, white upper triangle written as DANGER
	Slightly toxic	Green coloured lower triangle, white upper triangle written as CAUTION

About Us

PROXA JAPAN is a progressive India-based agro-chemical company, deeply inspired by the innovation, discipline and precision that define Japanese technology and scientific excellence. With a strong commitment to quality and modern agricultural advancement, we develop a comprehensive portfolio of high-performance solutions including Insecticides, Fungicides, Herbicides, Fertilizers, PGRs and Bio-products—each formulated to support the diverse needs of Indian farming.

Driven by research, global standards and field-tested performance, our products are designed to protect crops, enhance yield potential and promote long-term agricultural sustainability. We focus on bridging the gap between advanced science and real farming challenges, ensuring that every product delivers reliability, safety and measurable results in the field.

At PROXA JAPAN, our purpose goes beyond crop protection. We aim to empower farmers with cutting-edge technology, premium formulations and trustworthy solutions that strengthen productivity and contribute to a healthier agricultural ecosystem. With innovation as our backbone and farmer-first thinking as our foundation, PROXA JAPAN is committed to shaping a stronger, smarter and more sustainable future for Indian agriculture.

Our Commitments

- ✓ Delivering premium-quality agro solutions that meet global standards
- ✓ Ensuring farmer safety, trust and long-term satisfaction
- ✓ Promoting sustainable and responsible agricultural practices
- ✓ Building transparent and strong business partnerships
- ✓ Innovating continuously to meet modern crop challenges
- ✓ Maintaining Japanese-inspired precision and consistency
- ✓ Providing reliable supply and quick service support
- ✓ Supporting farmers with knowledge, training and field guidance
- ✓ Developing eco-conscious solutions for long-term soil health
- ✓ Building a culture of trust, responsibility and excellence

*Rooted in Nature,
Growing for the Future.*

Our Values

- Quality
- Sustainability
- Innovation
- Community

Vision

“To redefine Indian agriculture by delivering Japanese-standard innovation, purity, and precision through world-class crop protection and nutrition solutions.”

We envision a future where every Indian farmer has access to scientific, sustainable and high-performance agro solutions that:

- Strengthen crop health
- Maximize yield potential
- Reduce farming risks
- Support soil and environmental sustainability
- Bring long-term prosperity to farming communities

Our vision is to bridge the gap between advanced global technology and Indian agricultural needs—creating a farming ecosystem that is **smarter, safer, more productive and future-ready.**

Mission

Our mission is to build a stronger agricultural future for India through disciplined innovation, responsible science and farmer-focused development.

- ✓ Deliver Precision-Driven Quality
- ✓ Innovate for Modern Crop Challenges
- ✓ Empower Farmers with Knowledge.
- ✓ Promote Sustainable Farming
- ✓ Build Transparent & Strong Relationships
- ✓ Ensure Consistent Availability & Support
- ✓ Advance Indian Agriculture with Global Standards

Our Products

PROXA JAPAN – Our Product Portfolio

- Insecticides
- Fungicides
- Herbicides / Weedicides
- Plant Growth Regulators (PGRs)
- Fertilizers & Plant Nutrition
- Bio-Products
- Organic & Eco-Friendly Solutions
- Specialty Agro-Solutions

Quality Assurance

At PROXA JAPAN, we prioritize **precision, purity and performance**. All our products undergo **multi-stage quality testing, strict batch verification, and Japanese-inspired manufacturing discipline** to ensure global-standard outcomes.

We are committed to delivering **safe, effective and scientifically advanced** crop solutions that help farmers achieve:

- Higher productivity
- Better crop health
- Long-term sustainability
- Reduced environmental impact

Commitment to Sustainability-Our research-driven approach helps us develop products that **balance productivity with environmental responsibility**. By integrating **advanced chemistry and biological science**, we support farmers in growing healthier crops while **reducing chemical residues in soil and food**.

Why Choose Us?

- ✓ Innovative & Research-Based Formulations
- ✓ Japanese-Inspired Precision & Quality Standards
- ✓ Eco-Friendly & Sustainable Agro Solutions
- ✓ Scientifically Proven Crop Protection & Nutrition
- ✓ Farmer-Focused Approach with Reliable Support
- ✓ Transparent Business Ethics
- ✓ A Trusted Partner for Agricultural Growth

Join Us in Transforming Agriculture!

PROXA JAPAN invites you to be part of a **new era of smart, sustainable and scientifically advanced agriculture**. Together, let's build a future where farming becomes more **productive, eco-friendly, resilient and rewarding** for every farmer across India.

INSECTICIDES

COMMON INSECT PESTS OF CROPS

Insecticides are chemicals used to control insect pests by killing or preventing them from damaging crops. They help protect cultivated plants from insect infestations and diseases caused by insect vectors. Most insecticides work by affecting the nervous system of insects, inhibiting essential enzyme production, or interfering with metamorphosis.

Insecticides are classified based on their mode of action into the following categories:

- **Stomach Poisons** – Act when ingested by insects.
- **Contact Poisons** – Kill insects upon direct contact.
- **Systemic Poisons** – Absorbed by plants and ingested by insects feeding on them.
- **Fumigants** – Act in gaseous form to eliminate pests.
- **Repellents** – Keep insects away from treated areas.
- **Attractants** – Lure insects for trapping or control.

Many insecticides function through multiple modes of action for effective pest management.
